No Fault Of Grand Theatre

Ripley Ladies' Aid

There appears to be some misunderstanding around town regarding the dance advertised in the Mirror on April 1st. May 1st, and the management of the Grand theatre are being held as responsible for the cancellation of the dance. This is not according to the facts, the theatre was engaged by the manager of the Plaza orchestra, who later cancelled the date. The local management had nothing to do with arranging the dancer calling it off.

The ladies of the Ripley district have organized a dance to be held on the 1st of April, following the list of officers elected April 17th:

President, Mrs. R. D. Carr; Vice-Pres., Mrs. E. S. Roeper; Secy-Treasurer, Mrs. Stanley Roger; Mrs. F. A. Mann Mrs. R. M. Snyder.

About 250 Jute Sacks for sale, 2 for 15c. Jaynes Bakery, Mirror.

MIRROR WILL SEE GOOD BASEBALL

On Monday evening last a meeting was held at Lacombe to re-organize the Central Alberta Baseball League and representatives from Galt, Lacombe, Mirror, Ponoka and Red Deer were present. H. H. Crook, manager of the Mirror team and W. Walker were the delegates from here, while other Mirrortites who attended were N. J. Devereaux, E. L. Estell, Dr. K. MacLennan, Albert and Wm. Ross.

Delegates were elected and a considerable amount of business was transacted. Rules and regulations governing the same league last year were adopted with a few alterations to suit a baseball season.

It was decided to open the season on Saturday, May 24th, and a committee comprised of representatives from the clubs concerned will report to the public tomorrow (Thursday) to draw up the schedule and complete the arrangements.

Obituary

The death took place Tuesday morning (April 20th) at his home in this place of J. R. Wright, in his 63rd year, following an illness of over two years of cancer of the face.

The late Mr. Wright was born at Bloomington, Iowa, in 1861, married in 1880 to Anna Pitman, and moved to this district in 1905, taking up land four miles west of town where they resided for some years, then moved to the village of Basalt, now Worstered, then moved to the town and Mr. Wright entered business, being in almost continuous service since 1910 and making many friends throughout the district.

Mr. Wright was first taken ill about two years ago and shortly after went to Regina for an operation. For a time after his return he seemed to improve, but later the dread disease took a firmer hold and he gradually grew worse until that during the past year he has suffered terribly, the end coming Tuesday morning about five o'clock.

Left with his wife to mourn his passing, one brother, T. E. Wright, Langdon, Kansas, one sister, Mrs. L. Williams of Hubbell, Neb., and four half brothers and sisters, Mr. and Mrs. Miller, and three in the States, and one stepson in Texas.

The funeral was held from his late residence on Wednesday afternoon and was followed by the Rev. Mr. Bainbridge interment taking place in the Bashaw cemetery.

To the bereaved wife and relatives the heartfelt sympathy of all our friends will be extended.—Herald Star.

The late Mr. Wright was a resident of Mirror a number of years ago, and the many friends here will sympathize with the family in their loss.

Quite a number from Mirror attended the funeral services.

Livestock Shipments

The Alberta Co-operative Livestock Shipping Association shipped a car of cattle and hogs from Mirror on Tuesday, a car of cattle from Clive, and a car of hogs from Fort Macleod on Friday. Shipments made by the Association last week included ten cars of cattle and hogs.

Good Picture

The motion picture put on in the Grand theatre last Monday, "From the Mangerto the Cross" appears to have gone with the impression that it did attend. The music provided by Miss Margaret McLean, pianist, and A. E. Might, violinist, added much to the entertainment. At 8:30 p.m. the University of Alberta, under whose auspices the picture was run, operated the machine.

2ND FORTNIGHTLY CROP REPORT

Advent of warm spring weather has hastened activity upon the land in Alberta, and operations are general. Seeding of cereals, mainly barley, in the southern districts of the province is about 60 percent completed, with 60 to 70 per cent, done in some localities, while in the central and northern districts, seeding is well under way. In fact, in areas in southern Alberta the new wheat is reported already above ground. Some seeding of oats has been done in the south.

Moisture conditions in the most part are favorable, but in south-eastern localities the soil is very dry and more moisture is needed for satisfactory germination. This condition does not exist, however, over very widespread areas. Slight rains have fallen during the past week in the Medicine Hat area and heavier rains are expected. Lettuce and onions are the first hill areas. No fresh precipitation in the central and northern areas has been recorded since last report.

Indications are that there will be a slightly increased acreage in wheat this season, most districts reporting to this effect, while one or two districts in the north reported reduced areas. The fact that very little fall plowing was done last fall makes any large increase in wheat acreage impossible.

Dates of Seeding—Dates on which sowing operations commenced this spring are reported as follows:

Medicine Hat, April 15; Brooks April 15; Youngtown, April 15; Olds, April 15; Claresholm, April 15; Olds, April 28; Lethbridge, April 15; Vegreville, April 18; Vermillion, April 20; Grand Prairie and Peace River, April 20.

Farm Labor.—There is still a certain demand for farm labor, particularly in the early part of the last report. The Provincial Labour Bureau has placed 4,500 men on the land this spring, an increase of more than 1,800 over the number placed last spring.

Bible Study Results

The following having duly complied with regulations have successfully completed their courses:

PRIMARY (Oral) in order of merit: Franklin Whiting, Robert Simons, Katherine Williams, Eva Simons, Eleanor Watters, Jack Spies, Ronie Oldring, Ray Thomas, Julia Williams, Danny Decker, Audrey Watson.

JUNIOR (Oral)—Douglas Williams, Wilfred Simons, Eddie Oldring, Ross Flewwelling, Norman Beeson.

INTERMEDIATE (Written)—Henry Flewwelling, Addie Croxton, Myrtle Simons, Robbie Oldring, Roy Walton, Mary MacKay, Augusta Pederson. Sponsored by the promoters that those who were unsuccessful will pursue the course in the fall.

New Cars

A number of new cars have made their appearance in Mirror during the past two weeks, these follows: Arnold Munroe, Charles Campbell, A. J. Larson, McLaughlin, Fisher, G. Johnston, a Premier; J. G. Cleland, a Ford Sedan.

How about your insurance? Is your home and furniture insured? If not, call and see Mrs. Tilley and get the best of service in placing your insurance.

ANNOUNCE THIRD ANNUAL TOUR TO THE COAST

Special Train from Winnipeg. Stops Made at Various Points of Interest

PERSONALLY CONDUCTED

This tour, which will be interesting to the holiday maker and of great educational value to the student and to the teacher, offers unusual opportunity for seeing under the most favorable conditions the Canadian Rockies, including Jasper National Park, and the Pacific Coast.

The special train, operated in connection with a motor and consisting of modern sleeping cars, equipment, dining car and observation car, will leave Winnipeg, July 2nd.

Stopping at various points of interest, the train will arrive at Prince Rupert on July 7th. At Prince Rupert the party will embark on one of the palatial steamships of the Canadian National Pacific Coast services—a cruise of 550 miles through the famous Inside Passage to Vancouver. While the tour terminates at Vancouver, those who desire to make

a trip to Victoria, may have that ticketed and "Victoria" as their destination without any additional cost.

The local agent of the Canadian National Railways will be pleased to give you full particulars of this tour, including the cost, choice of routes, returning, etc.

Stubble Fires

A number of prairie fires have occurred during the past week in the district around Lethbridge and its environs. The Gadysburg district has suffered several and one last Thursday on the flat west of Spotted Lake drew a gang of 15 men and 10 horses. About 30 acres of hay and 15 tons of feed belonging to Jas. Gadys, Evans Bros. and Wm. Stevens were up in smoke. Another fire in the same district yesterday morning caused some trouble before it was put under control. On Tuesday Georgo district had a siege of fire fighting.

J. F. Baugh, accompanied by Jas. Oldring, went to Calgary last Saturday to bring home the Ford. Owing to the snowdrifts they were unable to get to the rancher's convention. Mr. Baugh was compelled to leave the car and returned by train.

RED ROSE ORANGE PEKOE

National Unity And A National Policy

A Toronto financial paper deplores the fact that Canada "is apparently the only country in the world in which the absence of national unity and patriotism seem to stand out and in which strong antagonism exists between the two main parties." It urges "all to wipe on the past and its mistakes and for all classes to get together and agree on a great, definite, national policy that will unite sections, classes and interests for the upbuilding of Canada and Canadianism."

It is unfortunately only too true that there is a lack of unity, patriotism and national spirit in Canada, and the advice given in the above quotation is good. But the writer goes on to say that a greater spirit of patriotism deserves the Budget proposals at Ottawa for certain lower tariff duties being "based largely on prejudice," and declares that the reductions in duties are "a great disappointment to all thoughtful, far-sighted, loyal Canadians."

Is national unity to be developed in Canada by leading journals in the East? Is it to be developed in Canada by leading journals in the West? Is it to be developed in Canada by leading journals in the nation as a whole? Is it to be developed in Canada by leading journals in their country? Is it not quite possible, may not even probable, that the men of the West looking over their boundaries, prairies have greater vision than the men engaged up in the factories and counting houses of Eastern cities?

The Eastern industrial and financial interests goes on to say, "It is clear that most every leading journal has increased their protective tariffs, while in Canada we have had five reductions in five years," and we are told that "it would be presumptuous for us Canadians to claim superior intelligence or greater wisdom in economic matters than those other nations with their governments of experience to guide them."

With such a record of failure by the "more highly developed" nations—nations we confess we did not know there were so many in the class of bidders—it is more to the point to say that a policy which may suit these older, more rapidly populated, and highly developed industrial nations is not necessarily the policy best adapted to a young, sparsely settled and largely agricultural nation like Canada.

If in a world governed by high tariff protection, and with steadily rising taxes elsewhere, Canada has gone on reducing tariffs, one would imagine that, if our Eastern protectionist advocates are correct in their theories, conditions in Canada would be steadily becoming worse. But this same financial journal has for months past been devoting columns of space in refuting the theory of the more highly developed nations as to what is best.

The very same journal contains a "wall" from which we have quoted also gives facts and figures to show the "substantial" benefits which the tariff changes will confer on the whole mining industry of the Dominion. Any why should the Parliament of Canada not take action to benefit the mining industry? After all, the mining industry is also deserving of consideration!

With an annual article in the same journal, the question is devolved on us showing that "West's prosperity is a barometer for all business," that "the Western wheat crop is of vital concern to business enterprise from Halifax to Vancouver"; that "the agricultural West now furnishes the life-blood to a huge proportion of Canada," and it quotes approvingly the statement of the minister of agriculture that "whole communities, divorced entirely from almost tame pastoral uses, abide here and search lonely to the agricultural settlement of the prairies."

If through a reduction in the tariff on the implements of farm production greater prosperity and development is encouraged throughout the whole land, then surely the Government has a right to demand that the people reap the benefit. If we are to accept this financial journal's own conclusions and arguments the answer is emphatically "yes." In fact, if the Eastern manufacturers would only take that far-sighted vision with which he can possibly least be expected to see that he stands to gain far more than he can possibly lose through such reductions.

Again, from the incitements of its own position, the most amazing thing about this financial journal's outcry against the tariff changes is its frank admission that "In this turning to the free trade policy the Government is giving the country what the majority thinks they want." Well, if the majority of Canadians want it, then it is the duty of the Government and particularly of the minister of responsible representative government to abide by and grant the will of the majority and not refuse it at the behest of a manufacturing minority.

It is becoming more generally recognized that what Canada needs at the present stage of its development is not so much a high tariff wall to protect the Canadian market as a protected preserve for the manufacturers, but a fiscal policy which will provide the country, settle our vacant areas, develop our wealth of natural resources, and bring prosperity to the masses of our population, v.

Big Increase In Revenue
Customs and Excise revenue for Canada in 1922 showed an increase of \$20,267,516 over the revenue of the previous year. There was an increase in every branch of revenue. Customs duties amounted to \$152,492,184, excise taxes, \$121,815,565, and other duties, \$57,293,161; sundry collection, \$1,325,772, a total of \$329,492,556.

Pretty Phrase
The Swedes have a pretty word for the phrase "unconsciousness": they call it smunkmed, or the carressing month.

Babes and platos cause a lot of trouble because people refuse to let them alone.

"Was Freed of Gall Stones And Persistent Backache"

Mr. Alexander Bradley, R.R. No. 1, Carp, Ont., writes:

"I suffered from gall stones, and commenced taking Dr. Chase's Kidney-Liver Pill. I feel safe in saying that these pills completely removed my trouble, as it is some years since I was afflicted in this way, and I have not suffered from gall stones or even backache since. I have also found Dr. Chase's Kidney Food excellent for heart trouble, and shortness of breath."

Salvage Work Difficult

Gold Bars Still Being Taken From Wreck of Laurentic

There are now only 154 bars of gold worth \$1,200,000 on the wreck of the Laurentic, which sank during the war, and the salvaging ship Racey will shortly endeavor to recover this, said Commander G. C. O. Damant in the course of a lecture at the Institution of Naval Architects yesterday.

Four boxes of gold weighing 10 pounds each were recovered in such short time when the work started that it seemed as if operations would be completed in a week. Two more bars sprung up, however, and the vessel collapsed, making salvage work very difficult. Of the 3,211 bars which went down with the ship, 2,037 have been recovered during operations extending over six summers at a cost of two and one-half million dollars.

How the English Make Toffee
Old-Fashioned Candies Are Best For The Young Folk

Speaking of children, was there ever a child who didn't like toffee? If more of those old-fashioned candies were made at home there would be fewer cases of stomach aches in our households and fewer young men and women who take tablets for "indigestion."

The heat factor is made in this manner: Mix four cups of brown sugar and half a cup of corn syrup with half a cup of water, and put on the fire. When it begins to boil, add a few tablespoons of butter. Put the mixture back on the stove once more and boil until the butter has penetrated the sugar. Then add a few drops of vanilla extract.

Now take off the heat and then take off the fire and add four tablespoons of butter. Mix well and then wrap the toffee in wax paper or foil and, as the candy cools, mark it into squares. When it has hardened, break the toffee into small pieces separately. This was my secret: incidentally, you will find the flavor of "cleaning up" is a great deal less if you have used an enamelware saucepan for the cooking, since even the stickiest mixtures do not adhere to its porcelain-like surface.

It through a reduction in the tariff on the implements of farm production greater prosperity and development is encouraged throughout the whole land, then surely the Government has a right to demand that the people reap the benefit. If we are to accept this financial journal's own conclusions and arguments the answer is emphatically "yes." In fact, if the Eastern manufacturers would only take that far-sighted vision with which he can possibly least be expected to see that he stands to gain far more than he can possibly lose through such reductions.

Again, from the incitements of its own position, the most amazing thing about this financial journal's outcry against the tariff changes is its frank admission that "In this turning to the free trade policy the Government is giving the country what the majority thinks they want." Well, if the majority of Canadians want it, then it is the duty of the Government and particularly of the minister of responsible representative government to abide by and grant the will of the majority and not refuse it at the behest of a manufacturing minority.

It is becoming more generally recognized that what Canada needs at the present stage of its development is not so much a high tariff wall to protect the Canadian market as a protected preserve for the manufacturers, but a fiscal policy which will provide the country, settle our vacant areas, develop our wealth of natural resources, and bring prosperity to the masses of our population, v.

Supplied New Word

"Buncombe" Said to Have Originated In House Debate

Buncombe, meaning inflated or bombastic speechmaking, simply for effect, is said to have originated in the House of Commons in the Sixteenth Century. Folls Warden, a mountaineer of North Carolina, who represented Buncombe county, a part of his district, rose to speak, says the news item.

Buncombe, however, was clattering for the question, and several members gathered about the Carolinian, hugging him to desist, while others left the hall. The old man, however, persisted, saying that the power of his district's代表人 had speak so that he was in consequence bound to make a speech for Buncombe, hence the meaning of the word: to speak for more show or popularity.

Within a radius of eight miles from Sulgrave Manor, in Northamptonshire, lie the ancestors of George Washington, William Penn, John Adams, Benjamin Franklin, Henry W. Longfellow and Wharton Hurlong.

Other Way Round
"Was your last holiday judgment when you asked her for another month's rent?"

"On the contrary, old man. It was I who was put out."

A Lead Towards Moderation

Some World Power Must vindicate Its Faith in Disarmament

Without the intervention of some powerful force, or a world organization, or an armed world, someone or other has got to give a lead towards moderation. Somewhere or other a power must vindicate its good faith about armament disengagement, keeping its own armament notable in comparison, while the general will-to-disarm will never begin. Of course there is some measure of risk in this setting of the generous example. But there is risk also among everything that is worth saving. The chief danger lies in the clerical ambivalence of one power or another to secure an absolute physical security which, in truth, utterly destroys the possibility of peace negotiations, as for individual men, is neither to court the most obvious and gravest perils nor to dream of eliminating perils completely from their lives.—The Manchester Guardian.

Strike Big Gusher

Says Alberta Gas Well is Greatest in the Dominion

Measurement of the gas in the Rogers-Imperial well on the Alberta-Montana border, was taken by experts of the Royal Canadian Oil Company, and the Dominion geologists say. The gauge measured up to 23,000,000 cubic feet open flow, but was too small to record the total. C. W. Dingman, of the geological survey, declared the gusher was the greatest well in the Dominion, and the present record.

Samples of the gas were taken and a test is being made to learn whether it is wet gas. The well will be controlled and the drill driven deeper.

Pine Air is Good For Catarrh, Colds

Owners in pine forests never have had a better time than the winter of Catarrh. Upon this fact is based "CATARRHOZONE," which sends out a fine, aromatic, invigorating, cooling and soothing antiseptic of the pine forest.

The heat factor is made in this manner: Mix four cups of brown sugar and half a cup of corn syrup with half a cup of water, and put on the fire. When it begins to boil, add a few tablespoons of butter. Put the mixture back on the stove once more and boil until the butter has penetrated the sugar. Then take off the heat and add four tablespoons of butter.

Now take off the fire and add four tablespoons of butter. Mix well and then wrap the toffee in wax paper or foil and, as the candy cools, mark it into squares. When it has hardened, break the toffee into small pieces separately. This was my secret: incidentally, you will find the flavor of "cleaning up" is a great deal less if you have used an enamelware saucepan for the cooking, since even the stickiest mixtures do not adhere to its porcelain-like surface.

Tokio Building Memorial

City Planning to Preserve Memory of Earthquake Victims

To preserve the memory of 24,000 persons who perished in the terrible suffocation in the former military hospital in Honjo ward the afternoon of the September catastrophe, the city of Tokio plans to erect a memorial hall to cost £1,000,000.

This building will be the most appalling incident of Tokio's day of disaster. Thousands took refuge in the open space of military areas, exposed to the fierce flames. A sudden change of the high wind brought down a multitude of a heavy curtain of flame, smoke and gases, killing practically every one of the hundred thousand.

Production of Natural Gas
Alberta Second Only to Ontario In Production of Natural Gas

The production of natural gas in the province of Alberta during the year 1922, according to returns made by the Dominion Bureau of Statistics, was 6,125,260,000 cubic feet. In comparison with 5,836,129,000 cubic feet in 1921, this shows a decided increase. Alberta's second only to Ontario, which produced in 1922 a total of 7,969,000,000 cubic feet.

Helicopter Flies Half-Mile
Margot Raoul Pescara, the Argentinean aviator, is beginning to learn the rewards of performance in his experiments with the helicopter. He flew his strange-looking machine more than a half-mile, keeping at an altitude of seven feet. The test was carefully timed and controlled by representatives of the Aero Club.

Last Post
Mothers should do their duty to take a long careful look at Dr. Robert Bridges, England's post laureate, who is now in the United States on a lecture tour, for they may never see a post laureate again.

He has been the last post to hold the honorary post, according to the London Daily Sketch, which declares that the crown intends to let the office lapse.

Plan Floating Fair
A German floating fair will sail in July to make a tour of the ports of South America. The fair will be installed on the steamer "Hermala" in Rio de Janeiro. The firms which are participating will accompany the ship and endeavor to restore business relations severed by the war.

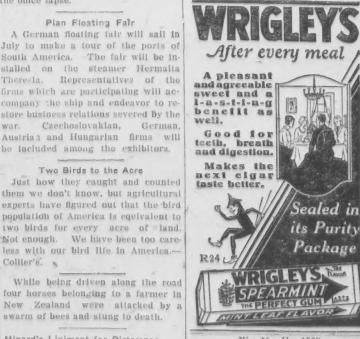

The "Hermala" will sail from Rio de Janeiro on July 15, and will stop at Santos, Brazil, and then proceed to Montevideo, Uruguay, and finally to Buenos Aires, Argentina.

Two Birds to the Acro
Just how they caught and counted them does not know, but a scientific expert has figured out the total world population of America is equivalent to two birds for every acre of land.

Not enough. We have been too careless with our bird life in America—Collier's.

Sugar Refinery For Macleod

A letter from the beet growers of Raymond asks for the signing up of six thousand acres of land for beet growing in 1925. Preparation of the ground for the new season starts this fall, and sowing next season will be done by the first of March. If this amount is signed up, a proposition will be made to build a sugar refinery in Macleod, as it is looked upon as the point where in the near future sugar beets will be the largest crop. The petition for signatures is now being signed throughout the district.

Northern Alberta Pioneers Have Unshaken Faith In Its Agricultural Possibilities

"I some of the plots that carried us up to the springtime was used in meeting post-war conditions, our difficulties would look less serious," is the opinion of a number of the old settlers in the Beauvoisville district of the Peace River country of Northern Alberta.

A number of these men, who have spent from ten to sixteen years in the prairie, and are now retired, filled with their prospects, are now working with a view to getting settlers on the vacated quarters that every year in the rural sections or cities has available. A community-building organization to welcome newcomers and assist them in getting established.

While keenly alert to the transportation handled on the prairies, they have not offset this, in the time being, new, cheap, reliable and cheap soil, relatively low taxes, abundant fuel and building material and water, and are pleased to make the best of things in the way of opportunities.

"Settlers," they say, "in common with others all over the west, commended the error of reckless borrowing at rates of interest that farmed it is normal times can hardly be expected to end, and having the experience of the country and its novel problems, made mistakes in cropping and farm practice generally, we have certainly no stigma to attach at all to those who have failed."

But when we find the most disengagement along the prairie railroads; when we find men aplenty going "back" at straight grain farming on the prairies, we are bound to conclude, with cheerless at the farm gates, twenty, thirty, forty and even eighty miles back from stony other settlers millions a few rows, raising some hogs and poultry and gradually paying off debts, we are bound to infer that the people settled by the original landholders of their long haul, we can only conclude that a good deal is being charged to transportation that is really due to quite other causes, among which may be mentioned:

(1) Deflation of hand values due to an expectation of the continuance of war prices;

(2) Too much borrowing at impossible rates of interest;

(3) The hazard of straight grain growing, with its alternate wet and dry seasons, the fat and lean, long after previous seasons, and the resulting vaccination rations for the lean;

(4) The general bad effects of repeating one class of crop, leaving straw and reducing nothing to the soil;

(5) The excessive labor costs entailed upon a region by a system of farming that involves an annual round trip.

"While believing that snap parts of the Peace River country will for a long time to come produce a considerable volume of wheat, we expect to see that the soil of this region will not stand exclusively grain farming as long, even as the Red River valley of Dakota, where the plight of the wheat growers is well known, and the same calamity can befall the Canadian grain farmers," we said.

As far as we can see, the soil of this region will not stand exclusively grain farming as long, even as the Red River valley of Dakota, where the plight of the wheat growers is well known, and the same calamity can befall the Canadian grain farmers," we said.

According to the Dominion Fruit Commissioner, who has secured the opinion of whole series of fruit experts, the fruit industry in the Maritime Provinces and British Columbia is the greatest.

For second choice, British Columbia names Yellow Newton;

Alberta, Wagener; Saskatchewan, (Yellow); Manitoba, Golden;

Saskatchewan and Alberta both name Delidena for fourth place, while Saskatchewan favors Spy, and Manitoba, Wagener. For fifth place we have Delidena in Manitoba and Saskatchewan, and Wagener in British Columbia and Alberta.

There is evidence to show that, speaking generally, the prairie favor varieties that are grown quite extensively in British Columbia, and in the eastern provinces. In addition to Spy and McIntosh, inclining towards Gravenstein, Baldwin, King, Greening, Fanhouse, Baldwin, etc.

Motor Vehicles in B.C.

Motor vehicles have increased in numbers in British Columbia from 6,888 in 1911 to 29,260 last year, according to the provincial government records.

The total government expenditure on engineering shall makes possible a direct route from the world-famed Esquimalt Harbour to Oak Bay,

thus shortening the trip of two days.

In five years, ending March 31st, the expenditure amounted to \$75,541. Of this the Federal Government contributed \$12,511.55.

Their Skill Saved Them

When an engineer and a fireman at Beauvais, France, were working under a locomotive a hole was made in the boiler.

Both men managed to climb up, onto the engine, as the engine gathered speed, and had been carried several miles before it cracked down.

They had to apply the brakes with their foot.

The whole world looks to get the laugh on a lover.

Control Of Grasshoppers

The Most Successful Means to Combat This Menace

Locusts or grasshoppers lay their eggs in the late summer and autumn of every year and the young appear about May 1st of the following year. Every kind of field crop suffers from their presence. A leaflet issued by the Dominion Entomological Branch states that in Eastern Canada the most effective method of control in infested fields has proved effective in control: 199 pounds, Paris green or white arsenic half a pound, molasses 3 cups, juice of oranges or lemons 3 cups with peat compost fine, to the acre.

This mixture should be applied while dry. Another bait, which has answered well is: Sawdust 20 pounds, Paris green 1/2 pound, molasses, water, galls. Thirty pounds of either of these baits is sufficient to treat five acres of growing crops.

The morning is the best time for broadcasting.

The prairie pictures what is known as the Cridle nature has proved effective. This is made by adding 1 pound of Paris green, or white arsenic, and 1 pound of salt, to 15 gallons of water, mixed with 100 pounds of corn meal, until it makes the mixture just being added. Old pastures should be ploughed to a depth of at least six inches and immediately followed by harrowing.

Mixing Grain

That Canadian Grain Routined Through U.S. Is Being Mixed

That Canadian grain routed via United States ports for export has been introduced into the United States market, with the result that its quality has been made regarding the quality of such shipments, is asserted in a report by Leslie Bayld, chief grain commissioner, and George Stens, chief grain inspector, of the Bureau of Animal Industry, who are in charge of their research investigations in Europe. The government blamed the report in the House at Ottawa.

Shipments continued of wheat in early October via United States ports, chiefly Buffalo, and they endan-

ger the prestige of Canadian grain. The experts recommend that the Canadian government take steps to prevent the entry of grain into the United States in tightening of United States regulations.

Exporters of grain held the responsibility of grading export grain, which is sold on certificates and must be accepted by the purchasing countries.

In the United States, grain parts visited by the experts, complete satisfaction was expressed with the quality of grain shipped through Canadian ports.

Apples Popular on the Prairies

Varieties Which Are Most in Demand in the West

According to the Dominion Fruit Commissioner, who has secured the opinion of whole series of fruit experts, the fruit industry in the Maritime Provinces and British Columbia is the greatest.

For second choice, British Columbia names Yellow Newton;

Alberta, Wagener; Saskatchewan, (Yellow); Manitoba, Golden;

Saskatchewan and Alberta both name Delidena for fourth place, while Saskatchewan favors Spy, and Manitoba, Wagener. For fifth place we have Delidena in Manitoba and Saskatchewan, and Wagener in British Columbia and Alberta.

There is evidence to show that, speaking generally, the prairie favor varieties that are grown quite extensively in British Columbia, and in the eastern provinces. In addition to Spy and McIntosh, inclining towards Gravenstein, Baldwin, King, Greening, Fanhouse, Baldwin, etc.

ROBERT FORKE SAYS BUDGET IS STEP FORWARD

Ottawa.—"I utterly deplored and regret that there has been any bargaining between this group and any other group in this House," said Robert Forke, Progressive member for Edmonton, in the budget debate referring to statements made in the House and on the political platform that the government had bargained with the Progressives for their support.

"So far as I am concerned," added Mr. Forke, "the progressivism in this House is under no obligation to support any other group. So far as I am concerned, I am pledged to support no group except the one which I have called to London, having been called to England to consult with the Prince."

"I stated in the opening of the session that the government would get Progressive support when it brought down Progressive measures. I repeat that statement today."

It was not necessary for the Woods worth movement because it meant nothing. To support it would compel him to vote against the budget, which he believed to be fair for the country than the "more generous" estimates of the Progressives.

"If anybody in this House thinks that the Progressive movement is done, he is vastly mistaken," continued Mr. Forke. "In Great Britain progressive government is well represented. In fact, in the United States there is a drastic change impending in the system of government. We of this group see brighter things ahead."

The Progressive leader then commented on conditions in Europe, the reports that population was increasing and production decreasing, and expressed the opinion that building up our tariff wall would not be an effective answer. He declared, "We follow the idea that Canada should follow Europe's example in the tariff. Britain, whatever anybody might say was free trade. The comparison made by the Conservative party in Canada and the United States was reasonable. The United States had the advantage of climatic conditions, of great industrial development, and of the huge war profit she made before entering the war."

He declared the budget as a step forward. Canada had turned the corner and started in a new direction, and he hoped the government would continue in that direction. He said, "I am very anxious from Britain (A. R. McMaster) that there was no reason why the budget should not be presented in a simple manner. Dodd's Kidney Pills can be obtained from all druggists."

Every sufferer who tries Dodd's Kidney Pills is delighted with the results. They will cure you from Brestitis (A. R. McMaster) that there was no reason why the budget should not be presented in a simple manner. Dodd's Kidney Pills can be obtained from all druggists.

Economy in administration was a desirable aim, Mr. Forke said, but he hoped that health and education would not be overlooked. Both were of paramount importance.

CORNS

For cure relief apply Minard's daily. Excellent for bunions.

Smallpox at Sudbury

Sault Ste. Marie, Ont.—Eight new cases of smallpox have been reported in the last month at Sault Ste. Marie, and an appeal is made for continuance of compulsory vaccination of school children.

CUTICURA HEALS BABY'S BLISTER

Head Covered With Eruption, Hair All Fell Out, Got Little Sleep.

Cuticura Baby was a week old a fine rash broke out on his forehead and scalp, which later formed small blisters. The blisters soon opened and oozed a thick, yellowish fluid. His head was covered with sore eruptions. He cried and fell asleep. He got very little sleep.

An application of Cuticura Soap and Ointment. After using it he got relief and in two months he was well again. Dr. W. D. A. Caldwell, R. F. D. 2, Asulkan, Man., Jan. 12, 1922.

Dr. W. D. A. Caldwell Cuticura Soap, Ointment and Talcum helps to prevent skin troubles.

Sample Box Free by Mail. Address "Cure" 1000, Winona, Minn. Cuticura Soap shaves without a razor.

W. N. U. 1553

Prince May Visit Ranch This Autumn

Chinese Big Buyers Of Canadian Wheat

Calgary—"As His Royal Highness, the Prince of Wales, is likely to be with us again this fall,"—That is the opinion of Mr. William Beader, superintendent of Calgary parks, from Professor W. L. Carlyle, manager of the "Rocky mountain ranch" at Polk Lake, given over entirely to the manner in which the Prince of Wales intends to spend his autumn vacation this year, following cancellation of his proposed tour of the Yukon and Northwest Territories. Prof. Carlyle is at present in London, having been called to England to consult with the Prince.

Manitoba Farm Help

Few Farmers Want to Sign Up For the Season

Brandon, Man.—While a number of men are drawn from here to take work on farms, few of them are willing to accept a contract for the season.

They prefer to take employment by the month, or as long as seedings lasts, as they hope to be able to command higher wages during the harvest time when that would be possible under a seven-months' contract.

No More Pains In His Back

That's Why Manitoba Men Recommend Dodd's Kidney Pills

Mr. Stephen Kozak found relief and tells other sufferers to use Dodd's Kidney Pills. (Continued)—"After I had used six boxes of Dodd's Kidney Pills I felt no more pain in my back, and I am now in full health again in the morning." The doctor who prescribed the pills is Dr. Stephen Kozak, who lives in this place. He sends this as a guidance to others who are suffering from the things certain in this world; one is that everybody is liable at some time to feel pain in the back. The other trouble, the other is that Dodd's Kidney Pills relieve all forms of Kidney trouble, Rheumatism, Arthritis, Rheumatism, Bladder Troubles, Gravel and Urinary Disorders, even when the kidneys are destroyed.

The government has done its best to help the man on the street. The financial conditions of the country should be apparent by simple methods of book-keeping.

Economy in administration was a desirable aim, Mr. Forke said, but he hoped that health and education would not be overlooked. Both were of paramount importance.

TARIFF CHANGES AS CONCESSION TO INDUSTRIES

Ottawa.—Sales tax already paid on manufacturers' implements of production still in the hands of manufacturers and dealers will be returned to them.

A. H. Macmillan, minister of finance, tabulated a number of additions to his budget resolutions, chiefly benefiting manufacturers of implements and of steel. The resolutions provided for the return of sales tax on such items with certain reductions on implements before the budget was announced. This is to place the Canadian seller on an equal basis with United States dealers, who pay no sales tax on their products.

Shows handles and stems are placed on the free list. This, it is understood, all are imported from the United States. Rolled iron and steel, and wire, which were subject to a sales tax of ten per cent, are also placed on the free list.

As a concession to the steel manufacturers, ingot moulds, which are now taxed five, seven and a half, ten and ten per cent, were reduced to British preference, free, five, seven and a half and a half.

The duty is reduced on racing shells used by amateur rowing clubs, though not for the exclusive use of the clubs.

Other articles exempted from sales tax are: Fibre brick, lignite monte, and articles used in the smelting of iron ore; talcoids; Lapwood tubular notched coal; lime, sand, stone, water, oil and natural gas well; materials for the manufacture of fertilizers; dry materials to be used for the same purpose as sprays.

The value of imported matches and hand playing cards will include excise taxes. This change will make the same system of valuation on imported as on domestic matches and playing cards.

All wheelbarrows and jiggers are subjected to tax but licenses provided to help the necessary security for the payment of the tax and other requirements.

This change will put all wholesalers, and jobbers on the same basis.

On a Visit to Canada

Stood Second During March In Markets of World

Ottawa—China stood second in the list of buyers of Canadian wheat in March, 1924, and during the month of March, 1924. During the period China imported 2,519,564 bushels of Canadian wheat, valued at \$2,393,655. The United Kingdom took 2,519,535 bushels, valued at \$2,397,947. Belgium and France were the next most extensive buyers, each taking slightly more than a million bushels.

The total amount shipped during the year ended March, 1924, was 26,707,237 bushels. This shows an increase over the preceding year, when 21,074,568 bushels were exported.

The value of the wheat exported during the year was \$26,758,759, up \$1,612,754 over the previous 12 months.

Germany came second to the United Kingdom in the quantity of Canadian wheat purchased during March, 1924. The United Kingdom, 2,519,535; Germany, 2,519,521. The export of flour during the year ended last March, 17,134,929 barrels, an increase of 486,389 over the previous year. There was an increase in the exportation of oatmeal and rolled oats during the comparative periods. The value of oatmeal and rolled oats exported during the year ended last March was \$2,051,510, compared to \$1,596,527 during the previous year.

Canada's position in the world market for flour is improving, according to the latest statistics.

Will Inspect Railway

C.N.R. President to Make Personal Trip Over Hudson Bay Line

Winnipeg.—Sir Henry Thornton told a delegation from the "On-to-the-Bay" Association that he intended this summer to make a first-hand investigation of the Hudson Bay line through a personal trip of inspection which would take him to the end of steel and to the bay itself.

If the government would vote the money required to complete the line he quite willing to go through with it.

He quite willing to go through with it, as both supporters and opponents of the project were very enthusiastic in presenting their case.

C. F. Green, former Mayor of Winnipeg, was spokesman for the delegation.

Thornton is to inspect the line, as both supporters and opponents of the project were very enthusiastic in presenting their case.

He quite willing to go through with it, as both supporters and opponents of the project were very enthusiastic in presenting their case.

He quite willing to go through with it, as both supporters and opponents of the project were very enthusiastic in presenting their case.

WORLD HAPPENINGS BRIEFLY TOLD

A committee was appointed in the House of Commons to inquire into the subject of our pensions.

The vote of Quebec by two referendum decided that that would have daylight saving from June 15 to Sept. 10, and that the Mayor would be elected by the people from 1926 on.

Abolition of British duties on dried fruit will have a stimulating effect on the trade of the principal Canadian cities, it was predicted.

He also said that entomists were given an equal break with motor car drivers in the matter of alleged negligence.

He pointed out that in every accident between a motor car and a railway train, the driver of the train was never said that the driver of the train had not run his bell or blown his whistle, when, as a matter of fact, engineers had come to the point where it is the driver who is at fault.

When John Goldie first planned to send Thomas Jefferson, Beesle Basson, Charles E. Evans and a rest at-star to a meeting of the principal Canadi-

anists with whom he had been in touch, he was commanded-to-stand on the platform at Augusta, Ga.,

The Western Canadian hard court tennis championship will be decided at Regina, Sask., this year. It was de-

cided at a meeting of the British Tennis Association here. Play will

start on August 15.

General Amadeo Diaz was reelected as Minister of War for reasons of health. He will be succeeded by General Gómez in charge. Gen. Diaz was commander-in-chief of the Italian armies in the Great War.

J. S. Woodworth, M.P. for Winnipeg Centre, E. W. Guppy and C. Brown, were selected to represent Manitoba labor organizations at the British Commonwealth Labor conference in London, commencing Aug. 15.

The Kingdom of the Netherlands, whose bankers at one time were leaders to the world, recently concluded negotiations with American bankers for a \$40,000,000 loan, the first external borrowing on a dollar basis.

Lieut. E. A. Musch, an aviator stationed at the North Island air station, San Diego, Calif., was killed with another in mid-air, damaged one wing and fell 200 feet into San Diego Bay. Lieut. L. O. Waller, pilot of the other machine was uninjured.

Canadian refined sugar, valued at \$2,923,500, was exported during the month of March. Most of the exportation was at \$1,681,883.

During the twelve months ended March, 1924, 115,729,395 pounds were exported, compared with 292,441,291 in 1923.

There are 600 varieties of seaweed in Japan, of which are used for food or in the manufacture of commercial articles, such as glass, incense and iodine.

Home Not Complete Without Nervilene

When your stomach is badly upset, when you are relishing gas and suffering from indigestion, Nervilene will come from 39 drops of Nervilene. Take it in sweetened Water and you get rid of all trouble. Nervilene has been used for nearly half a century and is considered a necessity in most homes. It is a safe remedy in preventing many small ills that constantly arise. Sold everywhere in 25 cent bottles.

B.C. Lumber For United States
An average of approximately twenty thousand barrels of lumber shipped monthly from British Columbia to the United States last year. The total for '24 was \$39,000,000. The logs are worth approximately \$16 per thousand, so that the value of the monthly exports was about \$525,000.

Flirting With Death

Locomotive Engineers Call Attention to Perils of Auto Drivers

The law of the road seems to have given to that strange gamble #46 death which reckless auto drivers try to beat the railway train to the crossing by W. G. Johnston, president of the Alberta legislature and locomotive engineer. Mr. Johnston represents the district of Medicine Hat as a Labor member. His characterization of reckless motor car drivers was given in the legislature at Edmonton, where he called upon all motor cars to come to a stop before crossing a level railway track was under discussion. He requested the legislature on behalf of the locomotive engineers of the province to insert a clause in the Vehicle and Traffic Act making it obligatory for auto drivers to stop their cars before driving over any railway crossing. Mr. Johnston stated that the nerve of some drivers is such that they drive main line trains are still being waged on the part of the continued carelessness and reckless driving of auto drivers who seem to prefer flirting with death to losing a few seconds of time dealing with the engine.

He also said that entomists are given an equal break with motor car drivers in the matter of alleged negligence. He pointed out that in every accident between a motor car and a railway train, the driver of the train was never said that the driver of the train had not run his bell or blown his whistle, when, as a matter of fact, engineers had come to the point where it is the driver who is at fault.

When John Goldie first planned to send Thomas Jefferson, Beesle Basson, Charles E. Evans and a rest at-star to a meeting of the principal Canadianists with whom he had been in touch, he was commanded-to-stand on the platform at Augusta, Ga.,

The Western Canadian hard court tennis championship will be decided at Regina, Sask., this year. It was de-

cided at a meeting of the British Tennis Association here. Play will

start on August 15.

Chemist Advances New Idea

Claims Aspirin Will Revive and Preserve Cut Flowers

Cut flowers may be preserved from a week to six months by this method.

A well-known pharmacist states that he has not only preserved flowers several days beyond the time when they would ordinarily fade, but has revived them which will not open again.

The experiments were conducted with chrysanthemums. Some of these were put into water to which an aspirin tablet had been added; others had plain water.

The leaves, however, remained green.

After the addition of the aspirin to the water, the flowers opened again.

In another case flowers which had stood in a hot room over night and had lost their color were placed in water to which an aspirin tablet had been added.

They revived in two hours, looking as fresh as they did when picked the day before. The leaves, however, remained green.

The explanation of the action of the aspirin is that it acts as an antiseptic, interfering with the enzyme, which normally causes the elongation of the vessels of the stem at its cut surface.

In another ease flowers which had stood in a hot room over night and had lost their color were placed in water to which an aspirin tablet had been added.

They revived in two hours, looking as fresh as they did when picked the day before. The leaves, however, remained green.

Small Puff—Small Dose—Small Price

What do other eyes see?

Ask and answer this question honestly

Your mirror can tell you what is true, but it cannot tell you what is honest, or what is wise, or what is courageous, or what is beautiful. These injure skin. Wash thoroughly with Palmolive Soap before retiring. Rub the creamy, foamy lather well into the tiny crevices of the skin. You may give you may be yours today.

Millions of women now follow the example of Cleopatra, and the grace and beauty of schoolgirl complexion. You, too.

Just this

Cleanse the skin regularly, as theories say, to keep your com-

plexion lovely, radiant, youthful, and beautiful. Use Palmolive method.

With a thorough wash, you get a clear complexion. All day long it stays.

After a short time of use, you will see a marked improvement.

Many now use Palmolive for the bath—letting it do for the whole body what it does for the face.

The simple, and correct way

You cannot find a more effective beauty treatment. Because Palmolive Soap is made of rare palm and olive oils—famous for mild

action and gentle.

PALMOLIVE COMPANY OF CANADA, LIMITED

Winnipeg Toronto Montreal

Palm and olive oils—nothing else—Nature's own color to Palmolive Soap.

THE LATE Sir Henry Lucy

Father—Toby M.P. Punch

Remember Friends in War

In the will of the late Sir Henry Lucy, for many years the famous "Toby M.P." of Punch, a provision is made that at the annual dinners of the Punch Club, a portion of the money to be devoted to the guests to be smoked in memory of the donor. The will sets aside £100 to be invested and used for this purpose.

SH. Henry left many bequests to hospitals and charities in memory of various relatives. The estate is valued at £250,000. The will sets aside £10,000 to be invested and used for this purpose.

Clayey soil is unfavorable to vegetation because the soil is too close and adhesive to allow the free passage of air or water to the roots of the plants; it also obstructs the expansion of the fibres of the roots.

THE MONARCH OF THE ROCKIES

Few cameras enthusiasts approach Mount Robson, the monarch of the Rockies, without resolving to secure at least half a dozen good photographs to include in their albums when they return home. And to assist in this task, the Canadian National Railways management has arranged for a special excursion train to pass through the foot of Mount Robson and other towering peaks along the line. The train will stop for five minutes at the foot of this mountain.

Mount Robson and Mount Rub-

son Park is the mecca each year of thousands of tourists who have made the journey to the "Rocky First," and in the fall big game hunting enthusiasts find that the mountains are the finest big-game territory to be found on the American continent.

At the foot of Mount Robson, the grizzly, black and cinnamon bear and a wide variety of large mammals are to be found within easy reach of the hunter who may be equipped at the park.

The national parks are, of course, game sanctuaries, but game in the territory surrounding their

borders is lawful prey for the hunter, and usually, in the vicinity of a park, game is plentiful.

Practically shore Mount Robson, 10,000 feet in height, as it is seen from the north side, where the mighty peaks tower 10,000 feet above the level of the sea. Every year intrepid climbers attempt to scale its heights, and to find thrills of danger and adventure. A smaller picture inset shows Berg Lake, at the foot of Mount Robson, in the heart of Canada's fine mountain scenery.
